

The Honorable Marlene H. Dortch
Federal Communications Commission
445 12th Street S.W.
Washington, DC 20054

Dear Ms. Dortch:

Attention: Commissioners

Please consider this my comment in response to the Federal Communications Commission's Notice of Inquiry on the Effects of Communications Towers on Migratory Birds, WT DKT NO. 03-187, FCC 03-205. I am writing to urge the FCC to act now and implement preventative measures on all existing and new communications towers to prevent the unnecessary deaths of millions upon millions of birds.

I urge the FCC to adopt the September 2000 U.S. Fish and Wildlife Service (FWS) Guidelines for siting and construction of communication towers by the FCC. These measures, supported by the best available data, indicate that co-location, keeping towers under 200', avoiding guy wires, minimizing lighting, and using only white strobes at minimum required pulse rates would greatly reduce bird deaths – which as you must know are estimated between 5 million and 40 million each year.

I am aware that the FCC already has studies that indicate over 90% of the birds killed are neotropical migratory birds, and most migrate and are killed at night. Alarming, the birds killed include several endangered species and over 50 species on the FWS Birds of Conservation Concern List (2002), meaning special attention is needed to properly manage these species. For example, the Cerulean Warbler is on the 2002 list and a listing petition has been filed under the Endangered Species Act for this bird.

Please see that the FCC complies fully with the Migratory Bird Treaty Act, NEPA, and the ESA, and adopts measures now prevent further bird deaths at communication towers.

Thank you for accepting my comment.

Sincerely,

Cheryl Reid
6285 Muddy Creek Road
Pueblo, CO 81004-9751

The Honorable Marlene H. Dortch

Why let so many birds die needlessly each year when something can be done to help save their lives?? Please do what you can to prevent these unnecessary deaths at communication towers. Thank you.

Sincerely,

Conor Soraghan

Dear Ms. Dortch:

Attention: Commissioners

Please consider this my comment in response to the Federal Communications Commission's Notice of Inquiry on the Effects of Communications Towers on Migratory Birds, WT DKT NO. 03-187, FCC 03-205. I am writing to urge the FCC to act now and implement preventative measures on all existing and new communications towers to prevent the unnecessary deaths of millions upon millions of birds.

I urge the FCC to adopt the September 2000 U.S. Fish and Wildlife Service (FWS) Guidelines for siting and construction of communication towers by the FCC. These measures, supported by the best available data, indicate that co-location, keeping towers under 200', avoiding guy wires, minimizing lighting, and using only white strobes at minimum required pulse rates would greatly reduce bird deaths – which as you must know are estimated between 5 million and 40 million each year.

I am aware that the FCC already has studies that indicate over 90% of the birds killed are neotropical migratory birds, and most migrate and are killed at night. Alarming, the birds killed include several endangered species and over 50 species on the FWS Birds of Conservation Concern List (2002), meaning special attention is needed to properly manage these species. For example, the Cerulean Warbler is on the 2002 list and a listing petition has been filed under the Endangered Species Act for this bird.

Please see that the FCC complies fully with the Migratory Bird Treaty Act, NEPA, and the ESA, and adopts measures now to prevent further bird deaths at communication towers.

Thank you for accepting my comment.

Sincerely,

Katherine Saint
90 Sylvan Crest Drive
Southbury, CT 06488-1700

The Honorable Marlene H. Dortch

Dear Ms. Dortch:

Attention: Commissioners

Hi and good day!!! PLEASE Do what you can to protect birds in the future!!!! Thanks for your time!
There is NO excuse for NOT doing the right thing in this day and age! Please consider this my
comment in response to the Federal Communications Commission's Notice of Inquiry on the Effects of
Communications Towers on Migratory Birds, WT DKT NO. 03-187, FCC 03-205. I am writing to urge the
FCC to act now and implement preventative measures on all existing and new communications towers to
prevent the unnecessary deaths of millions upon millions of birds.

I urge the FCC to adopt the September 2000 U.S. Fish and Wildlife Service (FWS) Guidelines for siting
and construction of communication towers by the FCC. These measures, supported by the best available
data, indicate that co-location, keeping towers under 200', avoiding guy wires, minimizing lighting, and
using only white strobes at minimum required pulse rates would greatly reduce bird deaths – which as
you must know are estimated between 5 million and 40 million each year.

I am aware that the FCC already has studies that indicate over 90% of the birds killed are neotropical
migratory birds, and most migrate and are killed at night. Alarming, the birds killed include several
endangered species and over 50 species on the FWS Birds of Conservation Concern List (2002),
meaning special attention is needed to properly manage these species. For example, the Cerulean
Warbler is on the 2002 list and a listing petition has been filed under the Endangered Species Act for this
bird.

Please see that the FCC complies fully with the Migratory Bird Treaty Act, NEPA, and the ESA, and
adopts measures now prevent further bird deaths at communication towers.

Thank you for accepting my comment.

Sincerely,

Sean McHugh
